

SuperSearch

The largest instant criminal database search available in the market today.

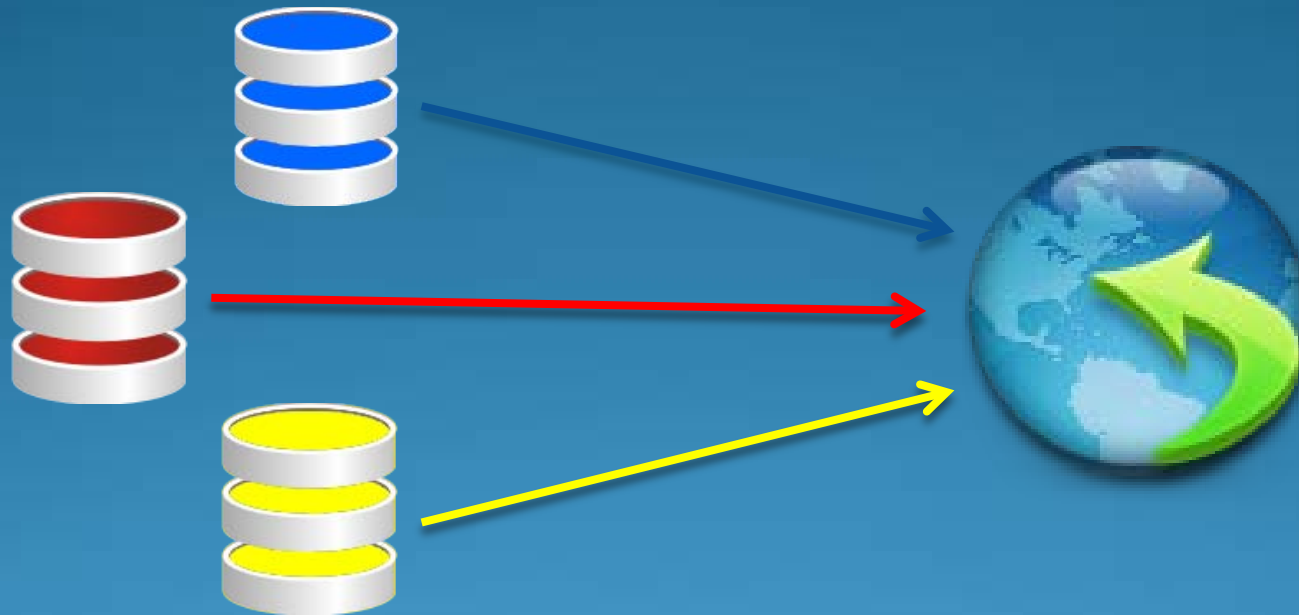

What is SuperSearch?

SuperSearch is the largest instant criminal database search available in the market today.

SuperSearch combines three major nationwide criminal databases - almost 900 million records total – each of which is often used on its own for other instant searches – to provide a far more complete and thorough search than a single-database instant criminal search.

This means that you are more likely to find possible problems that an applicant may be otherwise hiding, and you can protect yourself and your company from risk.

SuperSearch is not intended to replace county-level searches and certain types of state-level criminal searches, but rather to compliment them.

-  County-level and state-level physical searches have the advantage of greater accuracy, and are more focused on individual jurisdictions;
-  Instant criminal data has the advantage of being extremely broad-based, allowing you to cast a “wider net” by quickly pulling records from surrounding jurisdictions and all across the country;

The SuperSearch searches almost 900 million source records contributed by Federal, International, State, and County court systems and jurisdictions nationwide. Some additional sources includes:

-  Nationwide registered sex offenders in 49 states plus District of Columbia, Guam, and Puerto Rico;
-  Numerous national and international security and terrorism sources checked;
-  Criminal records in all 50 states (including jurisdictions and sources); Fugitive lists covering 50 states and Washington, DC, Guam, & Puerto Rico;
-  Results may include description of criminal charges, disposition, and sentence information;
